

Concord Engineering

ABOUT COMMISSIONING DIVISION

Concord Engineering's primary focus is on finding and correcting problems to provide a facility that works properly and meets the needs of the end users. We provide professional engineering experts in each MEP discipline, with design, construction, and testing experience required to perform testing and troubleshooting tasks. This includes mechanical, electrical, controls, and fire protection engineers. Our method allows the Commissioning Agent to become the agent for problem resolution, as opposed to just an agent for failed testing identification. We don't just observe symptoms; we diagnose the problems and provide the solutions that make your facility work.
